## PROFESSIONAL SUMMARY

MBA candidate and Computer Science graduate focused on business and product operations, with experience in analytics, SQL-driven reporting, forecasting, process improvement, and AI-enabled workflows. Skilled at connecting data, workflows, users, and business goals to improve operational execution and decision-making.

## EDUCATION

**Master of Business Administration**, University of California, Riverside *GPA: 3.92* **Sep 2025 - June 2027**

- **Honors:** Merit-Based Stipend Award, Beta Gamma Sigma
- **Leadership:** Strategic Partnerships Coordinator, AGSM Student Association; Vice President, Google Developer Group at UCR

**BS Computer Science**, University of California, Riverside **Sep 2021 - June 2025**

- **Honors:** Dean's List: Recognized for Academic Excellence

## RELEVANT EXPERIENCE

**General Manager | Indian Oil Corporation Ltd. (IOCL) Retail Outlet** **May 2023 - May 2026**

- Directed daily fuel station operations, including staff scheduling, inventory ordering, tanker unloading supervision, stock reconciliation, and service-quality execution.
- Managed daily financial reconciliation across cash, credit, and digital payments totaling over \$5,000 per day by verifying revenue against sales volume and inventory movement.
- Used sales trends, demand patterns, and high-traffic forecasts to optimize fuel and lubricant inventory planning during holidays, festivals, and peak-demand periods.
- Supported technical operations by developing SQL-based reporting and automation workflows for pricing updates, sales transaction data, and inventory visibility.

**Operations Analytics Intern | Hero Motocorp** **Jun 2024 - Aug 2024**

- Developed "Auto Soft," a data-driven inventory and service-management system using SQL and C++ to improve operational visibility across service workflows.
- Built SQL logging processes and stored procedures to organize 10,000+ service and maintenance records, reducing manual entry errors and improving data accuracy.
- Created a Pandas-based forecasting tool to predict inventory shortages and improve stock planning, while analyzing service metrics to identify turnaround-time bottlenecks.

## PROJECTS

**Duck Proof - AI Product Intelligence Platform**

- Developed an AI-powered product intelligence platform that converts customer review text, images, and videos into structured defect insights for product and operations teams.
- Built prototype workflows using PHP, MySQL, and Google Cloud Vertex AI to categorize defect severity and generate product improvement recommendations.

**Restaurant Supply Ordering Platform - B2B Workflow System**

- Designed a web-based B2B ordering platform for restaurant supply customers to browse products, select quantities, create accounts, and submit structured order requests.
- Organized supplier pricing/product data and planned workflow features including estimated totals, tax notes, invoice communication, and email order notifications.

**Hype-to-Help - Gemini Fan Engagement Platform**

- Built a Gemini-powered fan engagement platform that turns Olympic and Paralympic fan attention into respectful, inclusive support actions.
- Designed AI features including HypeCheck, Fan Impact Missions, and Paralympic Twin Mode using Gemini API and Google Cloud.

## SKILLS

- **Core Strengths:** Product Operations, Business Operations, Workflow Design, Process Improvement, KPI Tracking
- **Analytics & Systems:** SQL, Python, Pandas, Excel, Power BI, Tableau, MySQL, ETL, Forecasting, Dashboard Reporting, C++
- **AI & Product Tools:** Gemini API, Google Cloud, Vertex AI, Generative AI, AI Workflow Automation, Prompt Engineering, Product Analytics
